EDUCATION

Western Governers University 2021 | **Moorpark College** 2020 | **California State University of Northridge** 2018

Computer Science GPA 40 *Computer Science GPA 40* *Bachelor of Arts in History*, GPA 33

TECHNICAL SKILLS

Proficient in Python, C# HTML, CSS, JavaScript; Familiar with React/Nextjs, Django Python, Go, SQL, TypeScript; Exposed to Java, NodeJS

EXPERIENCE

Ventura County, CA *June* 2024 – Present

Freelance Engineering

- Designed and developed custom web applications using modern frameworks like Django, Nextjs, and React, delivering responsive, scalable, and user-friendly solutions tailored to client needs
- Collaborated with clients and team to define requirements and design custom web solutions
- Utilized Agile methodologies with CI/CD and Git to streamline software delivery and ensure quality outcomes

Scorpion, Valencia, CA *Sept* 2020 – Present

Software Engineer

- Developed an application that would accumulate design styles specified within the designed format, Figma, convert it to the code equivalent, and generate a foundational stylesheet for a developer to start a new development on a website, improving efficiency by 20%
- Solved critical business needs and eliminated 80+ labor hours per project by automating a previously manual data analysis process saving 80 labor hours per project
- Strong experience with debugging full-stack apps and tools; limited unit testing but highly effective in real-world problem tracing
- Designed, built, and optimized 12 websites and web applications, from layout to function, according to the specific client/brand specifications

Wood Ranch BBQ, Northridge, CA Nov 2015 – Sept 2020

Quality Lead

- Combined front-of-house excellence with managerial acumen to significantly contribute to a $10 million grossing sales location
- Played a pivotal role in training new staff to meet and exceed the company's service standards
- Maintained precise money management, contributing to the financial stability of the establishment

PROJECTS

- **Style Weaver**– Automated website creation by utilizing the Figma API to gather various specifications from a design and generate CSS code ready for development and also improved efficiency by 20%
- **Scrapey** – Created an automated advanced data analysis application in C# that scraped websites using Selenium and generated a CSV of the different pages that contained any script tags on that page, saving 80 labor hours per project
- **tylermcguecom-** Designed and developed a personal portfolio site using Nextjs (TypeScript) for the frontend and Go for the backend to capture form submissions Implemented GSAP for dynamic animations and Matterjs for an interactive drag-and-throw feature
- http://wrenvironmentalcom/ - Coded this site completely to client specifications utilizing HTML, CSS, JavaScript and using complex SQL queries to pull data
- https://wwwaquatotsfranchisecom/ - Coded this brand specific website using HTML, CSS, JavaScript, and SQL to achieve its complex design
